

Photographic Art Specifications

Photographic Art Size: We welcome artworks from all specs of camera, but remember the more pixels the larger we can make it and therefore the larger your market.

So the old adage applies, size does matter! The bigger the better and your artwork can be sold in all sizes (small, medium, large and x-large).

We welcome all file formats and where possible photographic art must be retouched and free of dust/specks (the quality you would expect to hang on your wall) but we do welcome a degree of artistic imperfection.

Your shots can come from all over the world universe, above ground and underwater and we don't mind if you list your fabulous artworks in other places...the more art-love the better we say.
